## ALL-WAVE TELE-RADIO

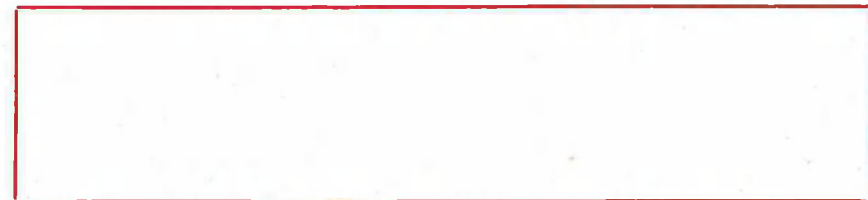

One instrument combining all that is best in radio and television has long been awaited. These handsome dual-purpose 10" and 12" consoles now offer clear large-screen pictures as well as world wide radio entertainment. The television equipment generally follows that of Table Model 921. In addition, radio of first-class performance is brought into use by raising a hinged section in the lid carrying the illuminated dial and controls of the All-wave radio unit. This remains supported until pressed down into the closed position, where it will continue to function. A Tone Control fitted on the front of the cabinet operates on both tele-sound and radio. In this ideal family entertainer the choice of radio or television is combined in quite the most convenient manner, with the radio section neatly concealed under the top panel.

**BRINGING YOU ENTERTAINMENT**

of unending variety—comedy and drama, sport, historical events, and a wealth of other features—for every taste. Full enjoyment of this modern miracle—the fascination of seeing events *as they actually happen*—depends upon picture *quality* or definition as well as on *size*. In Cossor Television the emphasis has always been on maximum picture quality and to the prime advantages of high contrast and vivid detail, there is added the largest possible direct-viewing screen on a 12" tube. This happy combination is particularly appreciated where comfortable viewing is desired in the average room under normal lighting. In this magnificent new model with its handsome two-tone walnut cabinet, Cossor brings you Television at its best, based on over fifty years of electronic research and application.

**12-INCH 5-CHANNEL BIG-PICTURE**
